	Examiner Anu Ramana	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-6, 8-10, 12-15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hershberger et al. (US 5,470,354).

Hershberger et al. disclose a system including a sensor array 150 that is positively located with respect to trial 84 and separable from trial 84 and a clamping frame or protector 86 with a mating positioning member (170, 172) wherein protector 86 has a mating positioning member 102 (Figs. 3, 5 and 7, col. 7, lines 46-67 and col. 8, lines 1-27 and lines 65-67, col. 9 and col. 10, lines 1-16).

Response to Arguments

Applicant's arguments filed on March 7, 2007 have been fully considered but are not persuasive for the following reason.

With respect to claim 1, Applicants' arguments are directed to a recitation of the intended use of the claimed invention. For e.g. in claim 1, Applicants' recite "may be temporarily secured to on the curved contour of the articulating surface of the trial." The recitation of intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

With respect to claims 5, 9, 10, 12-15 and 17, Hershberger et al. clearly disclose protector 86 to have a curved contour (Fig. 3) and provisional component or "trial" 84 to

have a curved contour (Fig. 3) with the sensor array 150 sandwiched between protector 86 and trial 84 (Fig. 7).

Allowable Subject Matter

Claims 2, 7, 11 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
